and

Allison Arwady, MPH, MD

Chief Medical Officer
Chicago Department of Public Health

Outbreaks to Opioids: Med-Peds and Public Health

Objectives:

- * Name at least 3 reportable diseases and understand the provider's role in reporting to public health
- * Describe trends in opioid overdose deaths in Chicago and the context for public health response to the opioid epidemic in both adult and pediatric populations
- * Understand the role of both public health and medical providers in investigation of outbreaks of infectious diseases
- * Be aware of considerations for adult and pediatric populations in the investigation of outbreaks
- * Apply public health concepts to advocate for the health of adult and pediatric populations
