Angelo M. Scanu, MD

Wednesday, April 4, 2018
3:00pm to 4:30pm

Bond Chapel
1010 E. 59th Street
Chicago, IL 60637
Angelo M. Scanu, M.D. (1924 – 2018)

Angelo M. Scanu, MD, Distinguished Service Professor Emeritus of Medicine, Biochemistry and Molecular Biology passed away on January 12, 2018 at the age of 93. Angelo was a pioneer investigator contributing immensely to the lipoprotein field and to the discovery of an unusual cholesterol containing particle associated with increased risk of coronary artery disease. Dr. Scanu’s important contributions did not go unrecognized. He was the recipient of many awards and honors among which are the Special Recognition Award from the American Heart Association Council of Atherosclerosis, the Distinguished Service Award from the Department of Medicine at the University of Chicago, the Fellow Rosette (Gold Science) from the American Association for the Advancement of Science, the Order of Eagles Award for Cardiovascular Research and the George Lyman Duff Lecture, American Heart Association.

His talent as a researcher transcended into his Lipid Clinic at the University of Chicago (Cardiology), one of the first such clinics in the city of Chicago. He was highly regarded by his patients many of whom ardently followed his suggestions for proper diet and exercise in their daily lives.

Dr. Scanu was a wonderful mentor and teacher for many scientists both nationally and internationally. Those who knew him and worked with him appreciated his analytical mind, deep insights, acumen and the highest level of scientific integrity. He shall be greatly missed by his family, and many friends and colleagues around the world.
Memorial Service for Angelo M. Scanu, M.D.

Prelude
  Asturias - Isaac Albéniz
  Recuerdos de la Alhambra – Francesco Tárrega

Remarks
  Faculty
